EXPERIENTIAL LEARNING

Nike

New York, United States

Consultant

January 2026 - May 2026

- Conducted market research, competitive analysis, and consumer segmentation to identify high-growth expansion opportunities
- Developed GTM, pricing, and brand messaging using participation trends, consumer behavior, and digital engagement signals
- Created AI-assisted product and campaign mockups to validate positioning ideas and support strategic recommendations
- Presented data-backed insights, influenced stakeholder discussions, and secured buy-in through structured executive storytelling

PROFESSIONAL EXPERIENCE

Accenture

New Delhi, India

Senior Product Manager

November 2023 - June 2025

- Led a cross-functional team of 19 to deliver a Salesforce CRM product solution by driving requirements gathering, roadmap planning, feature prioritization, and defining customer success metrics in a CI/CD-driven Agile sprint environment
- Directed FMEA-based risk assessment and JIRA defect tracking to resolve 150+ bugs, cutting issue resolution timelines by half
- Reduced retesting cycles by 20% through sprint planning, product specs refinement, and technical compatibility discussions with engineering and UX teams to translate PRDs, user pain points, and acceptance criteria into functional designs
- Accelerated onboarding by 60% for nine new associates with weekly knowledge transfer workshops and KPI dashboard tracking

Deloitte

New Delhi, India

Product Consultant

May 2021 - June 2023

- Deployed 50+ ERP workflow automation mapping 250+ user stories by automating processes through API integrations, aligning cross-functional teams on business requirements and sprint execution
- Facilitated A/B testing, feature release validation, go-live readiness with QA teams, reducing technical debt by 15% before launch
- Optimized resource allocation through operational analysis, budget forecasting, and cost-benefit evaluation to maintain delivery continuity and save \$300K in chargeable billing hours
- Improved usability for 100K+ users by 35% by implementing data-informed solutions using JavaScript, SQL, and Tableau to analyze customer behavior and user feedback to optimize engagement and refine product features

UI Developer – Deloitte (US Offices of India)

March 2019 - April 2021

- Owned end-to-end UI development for three SFDC portals by conducting user research & collaborating with four Scrum teams
- Boosted SEO ranking from 7th to 3rd by restructuring front-end architecture, improving website visibility and performance
- Translated Figma wireframes, product requirements, and customer insights into scalable UI solutions using Salesforce LWC and React frameworks, achieving 97% design accuracy across SDLC delivery
- Enabled 40% growth in mobile traffic by redesigning legacy web applications with responsive and accessibility-focused user interface strategies to improve cross-device accessibility and retention

Tata Consultancy Services

Bengaluru, India

Systems Engineer

October 2018 - March 2019

- Drove program adoption by managing feedback cycles, engagement tracking, and stakeholder communication between faculty and an 85-member trainee cohort, contributing to 97% project staffing in 16 days post program completion
